DETAILED ACTION

1. Receipt is acknowledged of Applicant's response filed 12/11/2008 in response to the Office Action of 9/26/2008.

2. Amendments to claims 11 to 24 are noted.

Allowable Subject Matter

3. Claim 11 is allowed.

4. The following is an examiner's statement of reasons for allowance:

Regarding claim 11, prior art fails to disclose a radiation system comprising a gantry with a static gantry part and a movable gantry part movably supported by the static gantry, a radiation head that is movable in a dedicated spacing of the radiation-shielding separating member separating at least two treatment rooms.

Close prior art by Takanaka (US 5,349,198) fails to disclose or make obvious a movable shielding which is part of the movable gantry and which shields from the radiation reaching the second treatment room when the radiation head is in the first position and which shields the first treatment room when the radiation head is in the second position.

Takanaka fails to disclose using radiation shielding to prevent radiation from affecting patients in the other treatment rooms. Takanaka also fails to explicitly disclose that patients and hospital staff can be present in the other rooms when the radiation beam is directed to an adjacent treatment room.

Ott (US 5,433,693) discloses a radiation treatment system with multiple treatment rooms which are spaced around a nuclear reactor core. Radiation from this reactor core is channeled through a beam tube to patients in the different rooms. A reactor shielding surrounds the nuclear reactor core and the walls and ceiling of the treatment rooms are covered with radiation shielding material. Ott discloses slidable shielding shutters that can be used to close off the beam tubes into the treatment rooms.

Both Takanaka and Ott either in combination or separately fail to disclose a movable radiation shielding that is part of the movable gantry part as disclosed in the present invention.

In the present invention, the radiation system has a radiation head which is supported by the movable gantry and is enclosed by a movable radiation shielding and hence can be used to deliver radiation in the first treatment room while performing a treatment set-up in the second treatment room, and subsequently the radiation can be delivered to the second treatment room while the results of the first patient room are reviewed. Hence

the total number of patients treated is much larger and more care can be provided to the patient before and after the radiation treatment.

5. Claims 12 to 24 are allowed by virtue of their dependence on claim 11.

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
